

RDK Code Work Flow Updates

RDK Central is pleased to announce upgrades to our Code Management Facility. As part of these upgrades, we have made improvements to our branching and code contribution workflow. We now have a new branch named "rdk-next" which will be used for all future contributions and quarterly releases. We will also have a monthly development iteration branch named "rdk-dev-yymm" for our monthly iteration releases.

The upgrades are implemented to increase the transparency and responsiveness to code contributions and at the same time ensure the highest level of quality for RDK deployments worldwide.

Our first releases using the upgraded infrastructure are already available at [RDK Central](#).

We want to thank the RDK community for your patience while we finalized this upgrade. If you have any questions, please reach out to support@rdkcentral.com
