TR--69 and 181 based monitoring tools for IP devices

Hi,

We see that "TR-69 and 181 based monitoring tools for IP devices" as one of the pre-release feature in RDK 1.2 for IP Clients. But this doesn't seem to be listed in the Release notes of Generic RDK 1.2. Is this feature planned for future RDK Releases? If yes, we would like to know the plan for this feature.

Regards,

Sreedevi
