

RDK-V Control manager integration in RPI

Build instructions for Control manager integration in RPI

The following commands fetches the source code using repo tool and create the image using bitbake.

```
repo init -u https://code.rdkcentral.com/r/manifests -b rdk-next -m rdkv-nosrc.xml
Errors and Challenges
repo sync -j4 --no-clone-bundle
observed in opensourced recipes
source meta-cmf-raspberrypi/setup-environment <select option raspberrypi-rdk-hybrid.conf>
