

RDK-C : Pipewire Upgradation Challenges

- [Introduction](#)
- [Pipewire Upgradation Errors and Challenges](#)
- [Pipewire media-session Errors and Challenges](#)

Introduction

This page is dedicated to bring up Pipewire(0.3.23->0.3.50) upgradation for RDK generic camera image.

Pipewire Upgradation Errors and Challenges

S. No	Errors/Challenges	Solution
1	meson.build:1:0: ERROR: Meson version is 0.53.2 but project requires >= 0.59.0	Modified meson version from 0.59.0 to 0.49.0 in meson.build
2	meson.build:1:0: ERROR: Value "true" for combo option is not one of the choices. Possible choices are: "enabled", "disabled", "auto".	Modified below details in meson_option.txt files type Feature to boolean value Disabled to false, Enabled to true, Auto to True
3	meson.build:238:9: ERROR: Unknown method "project_build_root" in object.	Modified project_build_root into build_root in meson.build file
4	meson.build:239:9: ERROR: Unknown method "project_source_root" in object.	Modified project_source_root into source_root in meson.build file
5	meson.build:259:0: ERROR: Dependency "sdl2" not found, tried pkgconfig and config-tool	Disabled sdl2 in meson_option.txt
6	meson.build:273:0: ERROR: Dependency "libpulse" not found, tried pkgconfig	Disabled libpulse in meson_option.txt
7	meson.build:275:0: ERROR: Dependency "avahi-client" not found, tried pkgconfig	Disabled avahi in meson_option.txt
8	meson.build:279:0: ERROR: Dependency "x11-xcb" not found, tried pkgconfig	Disabled x11 in meson_option.txt
9	meson.build:283:0: ERROR: Dependency "xfixes" not found, tried pkgconfig	Disabled x11-xfixes in meson_option.txt
10	meson.build:286:0: ERROR: Dependency "libcanberra" not found, tried pkgconfig	Disabled libcanberra in meson_option.txt
11	meson.build:290:0: ERROR: Dependency "libusb-1.0" not found, tried pkgconfig	Disabled libusb in meson_option.txt
12	meson.build:330:6: ERROR: Unknown method "allowed" for a boolean.	Removed allowed() method in meson.build
13	meson.build:332:0: ERROR: Dependency "webrtc-audio-processing" not found, tried pkgconfig	Disabled echo-cancel-webrtc in meson_option.txt
14	meson.build:354:0: ERROR: Unknown method "enabled" for a boolean.	Removed enabled object in meson.build
15	meson.build:370:0: ERROR: Dependency "lilv-0" not found, tried pkgconfig	Disabled lv2 in meson_option.txt
16	spa/meson.build:20:6: ERROR: Unknown method "override_dependency" in object.	Removed override_dependency used lines in /spa/meson.build
17	spa/meson.build:34:29: ERROR: Unknown method "allowed" for a boolean.	Removed allowed method in spa/meson.build
18	spa/meson.build:49:4: ERROR: Dependency "ldacBT-enc" not found, tried pkgconfig	Disabled bluez5-codec-ldac in meson_option.txt

19	spa/meson.build:53:4: ERROR: Dependency "libfreeaptx" not found, tried pkgconfig	Disabled bluez5-codec-aptx in meson_option.txt
20	spa/meson.build:55:4: ERROR: Dependency "fdk-aac" not found, tried pkgconfig	Disabled bluez5-codec-aac in meson_option.txt
21	spa/meson.build:65:2: ERROR: Dependency "libcamera" not found, tried pkgconfig	Disabled libcamera in meson_option.txt
22	spa/plugins/meson.build:4:30: ERROR: Unknown method "allowed" for a boolean.	Removed allowed() method in spa/plugins/meson.build
23	WARNING: Project targeting '>= 0.49.0' but tried to use feature introduced in '0.51.0': dep.get_variable spa/plugins/audioconvert/meson.build:133:2: ERROR: Function does not take positional arguments.	Disabled 'SPA_PLUGIN_DIR=@0@'.format(spa_dep.get_variable('plugindir')), this line in spa/plugins/audioconvert/meson.build and instead of this added 'SPA_PLUGIN_DIR=@0@/spa/plugins/.format(meson.build_root()), this line
24	WARNING: Project targeting '>= 0.49.0' but tried to use feature introduced in '0.51.0': dep.get_variable spa/plugins/audioconvert/meson.build:165:2: ERROR: Function does not take positional arguments.	Disabled 'SPA_PLUGIN_DIR=@0@'.format(spa_dep.get_variable('plugindir')), this line in spa/plugins/audioconvert/meson.build and instead of this added 'SPA_PLUGIN_DIR=@0@/spa/plugins/.format(meson.build_root()), this line
25	spa/plugins/bluez5/meson.build:8:6: ERROR: Unknown method "allowed" for a boolean.	Removed allowed object in spa/plugins/bluez5/meson.build
26	spa/plugins/support/meson.build:26:21: ERROR: Unknown method "allowed" for a boolean.	Removed allowed object in spa/plugins/support/meson.build
27	spa/tests/meson.build:7:2: ERROR: Unknown method "project_source_root" in object.	Modified project_source_root into source_root in spa/tests/meson.build file
28	WARNING: Project targeting '>= 0.49.0' but tried to use feature introduced in '0.51.0': dep.get_variable spa/tests/meson.build:37:2: ERROR: Function does not take positional arguments.	Disabled 'SPA_PLUGIN_DIR=@0@'.format(spa_dep.get_variable('plugindir')), this line in spa/plugins/audioconvert/meson.build and instead of this added 'SPA_PLUGIN_DIR=@0@/spa/plugins/.format(meson.build_root()), this line
29	src/pipewire/meson.build:136:6: ERROR: Unknown method "override_dependency" in object.	Removed override_dependency used lines in src/pipewire/meson.build
30	src/daemon/meson.build:20:24: ERROR: Unknown method "project_build_root" in object.	Modified project_build_root into build_root in 30.src/daemon/meson.build file
31	src/daemon/meson.build:40:2: ERROR: Automatic wrap-based subproject downloading is disabled	Disabled ms_proj = subproject('media-session', required : true) this line in src/daemon/meson.build
32	src/daemon/meson.build:46:2: ERROR: Unknown variable "ms_proj".	Disabled ms_proj used lines
33	src/daemon/meson.build:47:14: ERROR: Unknown variable "ms_bindir".	Removed ms_bindir used line
34	src/daemon/systemd/meson.build:1:40: ERROR: Unknown method "allowed" for a boolean.	Removed allowed object in src/daemon/systemd/meson.build
35	WARNING: Project targeting '>= 0.49.0' but tried to use feature introduced in '0.51.0': dep.get_variable src/daemon/systemd/user/meson.build:1:0: ERROR: Function does not take positional arguments.	Modified get_variable to get_pkgconfig_variable
36	src/tools/meson.build:37:24: ERROR: Unknown method "allowed" for a boolean.	Removed allowed object

37	WARNING: Project targeting '>= 0.49.0' but tried to use feature introduced in '0.51.0': dep.get_variable src/modules/meson.build:356:0: ERROR: Function does not take positional arguments.	Disabled below lines 'SPA_PLUGIN_DIR=@0@'.format(spa_dep.get_variable('plugindir')), 'PIPEWIRE_CONFIG_DIR=@0@'.format(pipewire_dep.get_variable('confdatadir')), 'PIPEWIRE_MODULE_DIR=@0@'.format(pipewire_dep.get_variable('moduledir')), Added below lines instead of above three lines 'SPA_PLUGIN_DIR=@0@/spa/plugins/'.format(meson.build_root()), 'PIPEWIRE_CONFIG_DIR=@0@/src/daemon/'.format(meson.build_root()), 'PIPEWIRE_MODULE_DIR=@0@/src/modules/'.format(meson.build_root())
38	src/modules/meson.build:463:0: ERROR: C library 'roc' not found	Disabled roc in meson_option.txt
39	src/meson.build:6:26: ERROR: Unknown method "allowed" for a boolean.	Removed allowed method
40	WARNING: Project targeting '>= 0.49.0' but tried to use feature introduced in '0.51.0': dep.get_variable src/tests/meson.build:9:2: ERROR: Function does not take positional arguments.	Disabled below lines 'SPA_PLUGIN_DIR=@0@/spa/plugins/'.format(meson.build_root()), 'PIPEWIRE_CONFIG_DIR=@0@/src/daemon/'.format(meson.build_root()), 'PIPEWIRE_MODULE_DIR=@0@/src/modules/'.format(meson.build_root()) Added below lines instead of above three lines 'SPA_PLUGIN_DIR=@0@/spa/plugins/'.format(meson.build_root()), 'PIPEWIRE_CONFIG_DIR=@0@/src/daemon/'.format(meson.build_root()), 'PIPEWIRE_MODULE_DIR=@0@/src/modules/'.format(meson.build_root())
41	src/gst/meson.build:11:43: ERROR: Unknown method "allowed" for a boolean.	Removed allowed method in src/gst/meson.build
42	test/meson.build:16:0: ERROR: Unknown method "project_build_root" in object.	Modified project_build_root into build_root
43	test/meson.build:16:0: ERROR: Unknown method "project_source_root" in object.	Modified project_source_root into source_root
44	man/meson.build:24:31: ERROR: Unknown method "allowed" for a boolean.	Removed allowed method
45	WARNING: Project targeting '>= 0.49.0' but tried to use feature introduced in '0.51.0': dep.get_variable meson.build:455:7: ERROR: Function does not take positional arguments.	Disabled get_variable used lines in meson.build
46	meson.build:471:6: ERROR: Unknown method "add_devenv" in object.	Disabled used add_devenv

Pipewire media-session Errors and Challenges

S. No	Errors/Challenges	Solution
1	meson.build:1:0: ERROR: Meson version is 0.53.2 but project requires >= 0.56.0	Modified meson version from 0.56.0 into 0.49.0 in meson.build
2	meson.build:66:0: ERROR: Dependency "libpipewire-0.3" not found, tried pkgconfig	Added pipewire in media-session recipe dependency variable
3	systemd/meson.build:1:7: ERROR: Unknown method "disabled" for a boolean.	Removed used disable in systemd/meson.build file
4	meson.build:116:17: ERROR: Unknown method "project_source_root" in object.	Modified project_source_root into source_root in meson.build
5	meson.build:117:17: ERROR: Unknown method "project_build_root" in object.	Modified project_build_root into build_root in meson.build
