Will OCAP still be provided in RDK 2.0?

#1 In article "RDK Developers Workshop September 11, 2013" which indicating RDK 2.0 will "... Removed reliance on OCAP...". Can you explain more detail about this action? Does it mean OCAP features will not be supported by RDK 2.0? Or the Java VM architecture of OCAP implementation will be replaced by another architecture? If replaced, what will be the alternative architecture?

#2 Will there be downloadable applications defined in RDK, like Google Play or Apple Store? If yes, any white paper or technical specification?

thanks
