RDK-V Sub-Systems

A way to look at RDK stack is based on various sub-systems that would make up a fully functional set-top stack. The main sub-systems of RDK components are classified as below: (Click on the corresponding box to get more details)

Network/ Connectivity	Home Networking	Device Management	Browser Framework	Graphics & UI	GStreamer
Wi-Fi	Concepts	Xconf / DCM	WPE	OpenGL	HTTP Source
Bluetooth	Protocols	Log Upload	QT Webkit	Westeros	QAM Source
MoCA	Interfaces	Telemetry		RDK Browser2	DTCP plugin
	Doxygen API	RDK Feature Control			RBI Filter
		WebPA			PlayerSinkBin
					HTTP Sink
					GST Analysis

Diagnostics	Display	Event Management	Containerization
TR-069	HDMI	IARM	Linux Containers
SNMP		BLE Voice
