Does current RDK-B support RPC-download?

Hi, we have a question about RDK-B.

After downloading RDK-B source code and reviewing the code, we can't find the source code to implement RPC-download to download firmware & make firmware upgrade. The namespace responsilbe for RPC-download defined in tr069pa is "com.cisco.spvtg.ccsp.fu.Configuration.", but no program registeres this namespace. So can anyone confirm that RPC-download implementation is not included in current RDK-B source code?

Thanks a lot!
