RDK 2.0 provided gstreamer plugins

Hi,

I am trying to create a list of currently provided plugins in the RDK 2.0 distribution (i.e provided under RDK Management LLC license).

The wiki documentation seems to be a bit a bit confusing. Specifically it mentioned an HTTPSource plugin here:

https://rdkwiki.com/rdk/pages/viewpage.action?pageId=14582224#

However I cannot find it in the RDK 2.0 sources. Is this no longer part of RDK 2.0?

The 2 main location for plugins in RDK source appears to be

$RDK_PROJECT_ROOT/mediaframework and $RDK_PROJECT_ROOT/gst-plugins, Are there any other locations I should be looking at?

Maybe this is a gstreamer community provided plugin. There is no way to tell from the wiki description.

Thanks,

Amir.
