

how to get rdk

Hi All,

I'm trying to get Generic RDK using link provided on [RDK 2.0 Release Package](#) page .

It points to <https://svn3.teamccp.com/svn/rdk/rdk/releases/generic/components/comcast> but I haven't access to this svn (I used my login/pass from rdkwiki).

Which credentials should I use to get generic RDK?

Thanks.
